Jay A. Block : 101 More Best Resumes before purchasing it in order to gage whether or not it would be worth my time, and all praised 101 More Best Resumes:

5 of 8 people found the following review helpful. This book was not helpful for me as a teaching professional.By K. L SadlerI needed to get my resume straightened out for applying for jobs as a science educator at a college level or as a disability/deaf rights activist, or maybe going back into Neuroscience which my MS from med school is in. I found this book was okay for people with high school, work experience, and a first degree from college, but not for someone like me who has 3 degrees and numerous experience in speaking to groups and writing for a variety of mediums. This resume definitely is not for those who need to write something closer to a curriculum vitae, but is adequate for everyone else. Needless to say I was somewhat disappointed because it came highly recommended. Karen Sadler, Science Education, University of Pittsburgh8 of 9 people found the following review helpful. Great resumes and tips for guidanceBy A CustomerI found this book to be very helpful, and include more variety than others on the market.

The online section was good - brief and to the point. I think this is a book for the future on getting your foot in the door. 0 of 0 people found the following review helpful. Good Professional Guidance By A Customer I found this book very helpful. I am director of sales, and found a good balance of examples and tips. Most of the resumes are geared toward business professionals, with an emphasis on how to develop your resume with the hiring company in mind. This is important in our industry from a sales perspective, and they teach you the same approach in presenting yourself to the customer, meaning the hiring manager/company.
