It is a wealth of knowledge for those who really enjoy the sport of air guns and it is written by an established legend in the field (Dr. Robert Beeman). What I really enjoyed about this book was reading the history of the companies in the industry and some of the history behind the guns - pretty fascinating stuff!For some reason, books on the air gun hobby tend to be outrageously expensive. This one is relatively current (c. 2014) and definitely worth investing in if you are an air gun enthusiast.0 of 0 people found the following review helpful. Good addition to an airgun library.By Harry T WatersCovers a lot, including older airguns, but falls a little short in coverage of new airguns on the market. It seems to follow in the ilk of other Blue Books in that respect. Since there is so little available in regard to airguns it is a valuable addition to your library.

This new 11th Edition of the Blue Book of Airguns is now 700 pages, and remains the most complete book on current airgun information and up-to-date values ever published. The airgun industry keeps improving its offerings to plinkers, target shooters, and maybe most importantly, hunters who want a viable alternative from firearms to harvest their game. The Blue Book of Airguns is the only publication that includes all the modern airguns, in addition to the hundreds of vintage airguns going back to the late 18th century!

With 125 years in the airgun business, Daisy is well-known for introducing young people to the shooting sports. And, we respond to the needs of discriminating adult shooters with our PowerLine and Winchester Air Rifle brands. The Blue Book helps collectors establish a value for their antique Daisy and serves as a directory for our exciting current product line. Most hunters and shooters took their first shot with a Daisy BB gun, and My first gun was a Daisy is a comment we never tire of hearing. While they may have an arsenal of airguns and firearms today, they value that first old Daisy as much as anything in their gun safe. For the shooting industry, It all starts here....with a Daisy. Thanks, Blue Book, for helping to preserve the shooting heritage that s so important to all of us. --- Ray Hobbs, President C.E.O. and Chairman of the Board of Directors, Daisy Outdoor ProductsAbout the AuthorDr. Robert D.
