Comprehensive and Detailed Job Search GuideBy DavidThis book includes all aspects of the job search process from expanding networks, resume and cover letter writing to strategic wording and research tips. It is a book I highly recommend for international students to read even before they start their academic programs.The book's method is applicable for all students, but reading the book early will definitely

save you from the worries and anxiety in the job search process. Seriously, read the book and save yourself from the misery so many students have suffered through. Good luck, fellow internationals! 1 of 1 people found the following review helpful. If you want to get a good job, buy *3 Steps To Your Best Job Ever!* By Adam West. Steve Steinfeld has masterfully fit a ton of useful information into a straight-forward, no nonsense book that is easy to read and easy to follow. The reader does not have to sift through a lot of fluff and the writing is not flowery. He tells you what you need to do, he tells you how to do it and then he guides you into putting the whole thing into action. The author really understands people, business, human resources and networking. For folks that need some help learning to network, he walks the reader through it. There is interviewing help that will help you be diplomatic and professional. So many "self-help" books do not give you your money's worth. This book gives you your money's worth and then some. If you are serious about getting a job that is the right fit for you this book is the best bang for your buck. I have read many of these books and this one is the most useful. That is why I give it five stars and I highly recommend it without hesitation. 1 of 1 people found the following review helpful. *A Must Read For Any Job Hunter* By Diane Branch. Regardless of whether you are a recent graduate or you have years of experience in the job market, the process of finding a job is overwhelming to most people. I recommend Steven Steinfeld's book if you want a no nonsense guide to developing a successful campaign for obtaining the right job. Steven's methods were developed from years of successfully counseling job seekers as an executive coach and lecturer. His three step approach: discovery, planning and action, takes the fear out of a job search and simplifies the process. His methods not only take the intimidation factor away; they make a job search fun. This book cuts through much of the time used by other books of this type by deleting the countless chapters composed of "soul searching" exercises. Instead, Steven shows you how to get directly to the hiring decision makers in order to obtain a job offer for the job that is the best fit for you.
